**DIMAPUR, SEPTEMBER 26**

"BIZHORN" a two-day inter-college management fest organized by the department of Management of ICFAI University Nagaland (IUN) under the theme "Igniting minds, bridging gap" began today at IUN campus.

IUN with its main objective of bringing young minds together through their various talents has organized the annual fest 'BizHorn' where students from various colleges can part take in the event while showcasing their various talents and also to expel the managerial and leadership

skills among the students.

Through 'BizHorn', IUN plans to create a platform for various colleges to participate which will help in contributing to the growth of knowledge and motivate the young minds to master oneself in the field of knowledge and innovation.

Various activities like business plans, debate, sketching, product launch, ad campaign, corporate relay, paper art, just in time, etc. were the topics where students of IUN and other colleges had to compete for a winner through their application of classroom learning in a practical output.

Pro- Vice Chancellor, IUN, Dr. C.P Alexander in his welcome address highlighted that the main purpose of education is to produce autonomous individuals who will become the pragmatic asset of the society.

He said through this programme the university aims to send out a message of a good business presentation that the university imparts to the students.

He stated that, "Through this fest we expect students to gain hands-on experience in a stimulated business environment." "BizHorn" will mark its end on September 27 at IUN Campus.

# Revive the culture of work, says Nuklutoshi

MINISTER of Mechanical & Highways and Soil & Water Conservation, Nuklutoshi has said that education aids development of states and peoples and has encouraged nurturing 'minds.'

'The development of a society in all spheres is a testimony of successful minds,' Nuklutoshi said during the valedictory programme of 'BizHorn', a festival of Institute of Chartered Financial Analysts of India, Nagaland chapter, of which he was the chief guest. The festival was held for two days and culminate don Saturday, September 27.

Addressing the students of the university, the minister said that the catchword for education in the modern times was 'learn, re-learn and continue to learn.' The reason is, he said, education is very important to bringing economic development in the state.

Nuklutoshi encouraged the students to be produc-

tive assets and not liabilities for the society. He said progress can be achieved only if the students were focused and dedicated in their effort of achieving the goals that had set.

The minister also lamented that the 'educated unemployed' population has become one of the biggest problems in the Naga society. Nuklutoshi advised the students to work hard and help the state in eradicating the problem of unemployment which, he said, continues to increase.

Continuing on the subject of responsibility in students, the minister lamented that the Nagas today had become 'too dependable and lazy.'

Nuklutoshi advised the students to revive the legacy of 'work culture' which he claimed was 'bestowed by our forefathers.'

He encouraged the students' community to strive to leave a legacy of communal harmony without any 'tribalism' and conflicts among the tribes and

groups. The only instrument that can bring development to the people of the state and the society in general, the minister explained, was unity. Unity has the capacity to solving 'every problem' facing a community, the minister explained.

Pro-Vice Chancellor of the university, Dr. CP Alexander, also addressed the event. In his address, the Pro-vice chancellor said that the institution aspires to 'bring educational benefits' to the youths and students of the state through quality teaching. The curriculum of the university covers various courses such as BBA, BCA, BA, B.Com, MBA, MA (English), MA (Political Science) and PhD in management and interdisciplinary studies, he said.

He informed that the university has seen 194 students graduate till date. Most of them are placed in various companies, he said. The university started in 2006 with just 6 students but has now more than 300 students, Dr. Alexander said.
